

# ROAD TO BESPOKE

You get in touch with us about your desire to make a bespoke piece either via our website bespoke page or email.

You select a stone you like from our collection OR tell us what kind of stone you'd like for us to get for you.

You select an existing setting you like OR show us what you have in mind (doesn't need to be exact, since we will discuss the setting in detail and do sketches)

We meet and discuss in further detail what you're interested in.

If you'd like to see the stones in person, we can display a choice of up to 5 similar stones, and 5 unrelated stones should you want to see some other type/colour/cut/etc of gemstone. This number is fixed to ensure that you don't suffer choice fatigue and can pick your favourite based on your style and desire.

We will also discuss settings and your mood board.

We get sketching and show you a rough sketch based on what we discuss. If you are satisfied, and wish to proceed, we will begin the project after a 50% deposit on the estimated final price of the product has been paid.

We will then do a more detailed sketch based on the discussion. You are eligible for a one time free of charge redesign or edit on the design.

Once sketch is finalised, we will show you a CAD\* sketch of the final design so you can have a look at the ring in 3D and the final price of the end product.

Once we have shown you the CAD we will simultaneously begin the making of your Bespoke jewellery.

After that is all about sitting tight and waiting for your precious piece/s to reach you!

\*CAD refers to Computer-Aided Design, a digital software technology used by jewellery designers to create precise and detailed virtual models of jewellery pieces.
